

CORY R. KING

Seattle, WA 98102 · (206) 612-4530 · coryking.com · me@coryking.com

EDUCATION

Candidate for Master of Business Administration

2011-2014 (expected) Michael G. Foster School of Business, University of Washington Seattle, WA

Bachelor of Science in Technical Communication

2001-2004 University of Washington Seattle, WA

PROFESSIONAL EXPERIENCE

Clubhouse

2014

Chief Technology Officer, Co-Founder

- Guided by lean startup principles, performed hypothesis testing on potential features and markets.
- Used off-the-shelf tools to create an easy platform to add landing pages used for A/B testing.

Cozi, Inc.

2010-2013

Because Cozi was a small startup, I worked many roles concurrently. Key Technologies: Python, Javascript

Senior Full-Stack Software Developer

- Led development for a wide range of customer-facing web-based features including data import, schedule and calendar management, and a highly popular meal planner.
- Led grassroots effort to lower engineering and customer service costs by creating a suite of internal “self-service” tools for use within the entire company.
- Took complex “raw” data and distilled it into accessible, understandable reports for marketing, engineering, finance and product development.

Senior Operations Engineer

- Achieved 99.9% uptime on a system with more than 11 million accounts and peak loads of over 80,000 requests/min.
- Greatly improved reliability and maintainability of Cozi’s application stack by migrating from a pool of “one-off” bare-metal systems into a hybrid cloud system.

Release Manager

- Worked with stakeholders and engineers to coordinate the release and deployment of over 20 different products.
- Led effort to drive the company to an automated, continuous deployment system.
- Identified and removed bottlenecks in the release process, shortening deployment times from up to an hour to mere minutes.

Mozi Media Group, LLC.

2004-2012

Owner, Founder

Key Technologies: Perl, Javascript, C#

- Creator of a content management system—*Mozi*code. The largest website is [Photographica](#); a community photo-journal.
- Based on usage statistics, user feedback, and new trends in technology, added (and sometimes removed) features on the website in order to improve the community and better monetize the website.
- Created a sophisticated rich-text editor in order to remove the need for users to learn a specialized markup language to add photos and slideshows in their stories.

Contract Software Development Engineer

Worked with clients to improve their websites using a wide variety of technologies and platforms.

- Worked with an extreme sports blog, [kisquest.com](#), to allow for better integration of advertising, more control over content placement, and greater focus on the client’s video content.
- Created a new version of Azalea’s flagship barcode software.

- Worked with Azalea and their business partners at SAP to develop a new barcode feature in Crystal Reports.

Microsoft

2009-2010

Senior Software Developer (contract) – MSN Live Site Engineering

Developed suite of internal operations tools. Key Technologies: C#, ASP.NET, Javascript

- Lead developer & designer responsible for “version 2” of a web-based scheduling application.
- Lead developer responsible for the front-end design and implementation of a WPF-based change management system.
- Improved the team’s development process by instituting an automated build and deployment system.

iFloor.com

2004-2005

Software Developer

Key Technologies: Perl

- Increased customer conversion by streamlining the online checkout process.
- Improved the layout and navigation of the product and category pages to make it easy for customers to find what they needed.
- Created a wishlist feature to allow potential customers to save their favorite floor choices.

Azalea Software, Inc.

1997-2003

Software Developer

Key Technologies: C, C++, VB.NET

- Created a multi-platform barcode SDK for both managed and unmanaged clients.
- Created add-ons and plugins for various applications allowing customers to quickly add barcodes into their documents, spreadsheets and databases.

SKILLS & ACTIVITIES

Extremely Competent

Python, jQuery, Backbone, Underscore, JavaScript, Flask, Jinja, CSS, AJAX, Responsive Web Development, SEO, Git, Jenkins, PostgreSQL, MySQL, Redis, RabbitMQ, Puppet, Openstack, AWS, Zabbix

Lots of Experience

C, C#, Perl, PHP, Powershell, ASP.NET, IIS, WPF, WCF, .NET, SQL Server, Regular Expressions, Google Analytics, Mixpanel, Optimizely

Some Experience

XNA, DirectX, C++, Ruby, DB2, ffmpeg, Drupal, ASP.NET MVC, Java, ANT

For Fun

Stop Motion Animation, Photography, Camping, Fishkeeping, Piano
